TOP KNOT
WATERBORNE WOOD FLOOR FINISH

2-Part Hardened Product
Unsurpassed Durability
Commercial of High Traffic Floors

Top Knot is the most durable, scratch resistant 2-component wood floor coating available. Ideal for commercial applications and high traffic residential floors where short time windows necessitate rapid hardness development.

Characteristics
Extreme durability and scratch resistance
Exceptional rapid hardness development
Excellent chemical resistance
Exceptional application properties
VOC does not exceed 275g/L

Recommended Uses
Heavy-traffic commercial and residential areas. Restaurants, Museums, Retail Stores, and other Commercial Venues.

Available in Matte, Satin & Semi-Gloss sheens
ADVANTAGE COATINGS TECHNOLOGIES: TOP KNOT WATERBORNE FINISH

Advantage Coatings Technologies waterborne products are produced using the highest quality ingredients. Our formulations are designed to provide exceptional performance and durability. Advantage waterborne formulations meet or exceed all state and federal clean air quality standards. This product contains less than 275 grams per liter (2.3 lbs. per gallon) VOC (volatile organic compound).

USE DIRECTLY FROM CONTAINER
DO NOT DILUTE!

Recoating Floors

Be certain floor is free of wax or oily residue. Clean floor thoroughly with Advantage Hardwood Floor Cleaner. Abrade floor with maroon abrasive pad (approx: 220 grit). Vacuum thoroughly. Tack with slightly damp mop or cloth. Apply finish. Note: Advantage Coatings finishes will adhere to most stains and finishes after proper preparation and dry times. Always prepare a sample or test area to determine compatibility.

Sanding and Finishing New Floors

Sand and prepare floors according to NOFMA accepted methods. For stained floors make a final cut with 80 grit paper and 80-100 grit screen. For unstained floors make a final cut 80-100 grit paper and screen 120-150 grit to minimize grain raise. Vacuum thoroughly and tack with slightly dampened mop or cloth. Abrasion between sealer and finish coats is not necessary for adhesion unless it has been more than 48 hours since the previous coat has been applied. For best results always vacuum and tack after abrading.

Finishing

Shake well. Remove cap and allow sealer or finish to equilibrate for 5 minutes. Pour a 4-6” wide line of finish with the grain along the starting wall. Use a clean pre-dampened applicator and pull the applicator forward with the grain of wood holding the applicator at a “snowplow” angle moving the puddle toward the opposite wall. Replenish the puddle, maintaining a wet edge. After each turn, pad out applicator and feather out all turns. To prevent lapping and dry marks use recommended coverage rates. (400–600 sq.ft./gallon). Allow finish to dry 2-3 hours. High humidity and/or low temperatures will extend drying times. Allow final coat to dry at least 48 hours before use.

Curing

The curing process takes approximately 7 days. Do not replace rugs or mats until the floor has fully cured. The floor may be walked on after 24 hours, but the floor is susceptible to scuffing or marring prior to completion of the curing time. Do not clean with water or detergent during the first week.

Clean Up

Tools should be cleaned with water.

Maintenance

Put walk off mats at all entrances to keep out dirt and grit. Sweep or vacuum as needed. Damp mop with Advantage Hardwood Floor Cleaner. The floor may be buffed with white polishing pad to restore luster.

Shelf Life

Minimum of one year in an unopened container.

Caution

Contains small amounts of P-series glycol ethers and NMP. Do not breathe vapors or spray mist. Use with adequate ventilation. Avoid contact with eyes, skin and clothing. Wash thoroughly after handling. Keep containers closed when not in use. Do not store above 100°F.

First Aid

In case of eye contact, flush immediately with water and get medical attention; for skin wash thoroughly with soap and water. If affected by inhalation, remove to fresh air. If swallowed, drink 1–2 glasses of water to dilute. Do not induce vomiting. Get medical attention.
